PROFESSIONAL SUMMARY

Undergraduate Software Engineering student at BINUS University with a robust academic foundation in software architecture, agile methodologies, and artificial intelligence. Highly motivated and continuous learner with a demonstrated track record of participating in advanced technical workshops ranging from Generative AI to Golang microservices. Possesses excellent analytical problem-solving abilities combined with strong interpersonal and leadership skills, seeking to leverage academic experience into impactful contributions within a forward-thinking technology environment.

EDUCATION

BINUS University (Bekasi Campus) | Sep 2024 - Expected 2028

Undergraduate Degree in Software Engineering

- **Core Focus:** Software Architecture, Data Science, AI Application, and Modern Development Methodologies.
- **Key Program:** Successfully completed the Excellence Program FYP B2028, establishing a strong foundation in university culture and academic integrity (Sep 2024 - May 2025).

CORE COMPETENCIES & SKILLS

Technical Skills

- Software Development
- AI & Data Analysis
- Agile Development & Low Code
- Microservices (Golang)

Interpersonal & Soft Skills

- Leadership & Team Training
- HR Management & Interviewing
- Analytical Problem Solving
- Professional Communication

Languages

- Indonesian (Native)
- English (Professional Working Proficiency)

TECHNICAL & ACADEMIC EXPERIENCE

School of Computer Science & DSAI | Nov 2024 - Jun 2026

Advanced Technology & AI Workshops Participant

- Participated in Data Science and AI specializations, including "Generative AI and Its Application in Industry" and "The Art of Data Hunting" (Jun 2026).
- Explored enterprise-level implementation of artificial intelligence through the "AI Use Cases Across Enterprise Functions" mandatory seminar (May 2026).
- Studied cybersecurity foundations and vulnerability assessments in the "Threat Modelling" session (Nov 2024).
- Gained practical exposure to backend engineering in the "Microservices menggunakan bahasa Go (Golang)" technical workshop.

Bina Nusantara Computer Club (BNCC) & BNEC | Feb 2025 - Nov 2025

Committee Member & Organizational Leader

- Contributed as a Committee Member and active participant for the 32nd BNEC Cadre Forming event, developing core leadership and team coordination capabilities (Feb 2025).
- Engaged in impactful community development initiatives through the BNCC Corporate Social Responsibility (CSR) program.
- Participated in tech-culture discussions such as "Humans in the Loop: Building Agility in the AI Era" and "Building Culture, Living the Work Ethic" at BFest 5.

Student Support Office Bekasi | May 2025

Agile & Software Design Participant

- Studied structured development methodologies in the "Agile, Low Code and AI Software Design and Development" comprehensive seminar.
- Participated in cross-disciplinary campus events including the MANCER Goes to Campus program and Marketeers Fun MLBB Competition, fostering networking and soft skill development.

BINUS International Office & IMCB | Sep 2024 - Feb 2025

Global Strategy & Business Management Seminars

- Analyzed global industry standards and sustainability practices in "Innovating for Sustainability: Strategies for Long-Term Business Success".
- Expanded international perspectives by attending the ISOCC Netherlands business management seminar and the "Grow Your Success Through Study in Taiwan" international office briefing.
- Evaluated market dynamics and national industry revolutions in "Innovating in Marketing: Revolusi Otomotif Indonesia" hosted by IMCB.
