PROFESSIONAL SUMMARY

Software Engineering student at BINUS University, expected to graduate in 2028. Most of my projects pair a trained model with a web app: chest X-ray tuberculosis detection, fake news classification (98.58% test accuracy) and face-recognition attendance. Comfortable across Python, React and FastAPI, from data preparation to a working interface. Looking for an internship, junior or full-time role in software engineering.

PROJECTS

FAKE NEWS DETECTOR, Machine Learning course
Python, scikit-learn, NLTK, Flask, Docker

- Prepared the ISOT dataset of 44,898 news articles, removing duplicates to 39,105 and cleaning text with NLTK stopword removal.
- Trained a TF-IDF (5,000 features) and Logistic Regression pipeline that reached 98.58% accuracy on the 20% test split of 7,821 articles.
- Served the model through Flask in Docker; the same model now runs in the browser on nabilalqadri.com, with the words behind each prediction highlighted.

TB DETECTOR, team project, AI course (semester 3)
Python, TensorFlow, Keras, FastAPI, Docker

- Handled dataset preparation, preprocessing, model training and evaluation for a Normal vs Tuberculosis classifier on 4,203 chest X-rays (80/20 split).
- Fine-tuned EfficientNetB0 with ImageNet weights on 224 px images; predictions are served through a FastAPI /predict endpoint.

FACE ATTEND, team of 3, contributor
React, FastAPI, Supabase, InsightFace, MediaPipe

- Integrated InsightFace (ArcFace) face matching into a class attendance system that records a student when they face the webcam.
- Connected the React front end to the FastAPI and Supabase back end.

PORTFOLIO WEBSITE, nabilalqadri.com
Next.js, React, Tailwind CSS, Playwright, GitHub Actions, Vercel

- Built a bilingual (English/Indonesian) portfolio with light and dark themes, scoring 99 mobile and 100 desktop on PageSpeed Insights, with accessibility at 100.
- Added Playwright end-to-end, accessibility and visual regression tests that run on every pull request in GitHub Actions.

CLASH OF BANG, individual web programming assignment
HTML, CSS, JavaScript

- Built a five-page fan-community website without frameworks, including a looping carousel and client-side form validation.

ORGANISATIONAL EXPERIENCE

UKM BNEC, BINUS University Bekasi
Staff, Human Resources Development, 2025 – 2026

- Supported HR management, member coordination and internal communication for the organisation.
- Helped plan work programs and events.

BNEC & BNCC, BINUS University Bekasi
Committee Member, Feb – Nov 2025

- Served on the committee for the 32nd BNEC Cadre Forming (Feb 2025).
- Took part in the BNCC CSR program.

KASIRAI, university team project
Chief Operating Officer, 2026 – present (concept stage)

- Worked on operations and product strategy for an AI point-of-sale concept for Indonesian small businesses; not yet released.

EDUCATION

BINUS UNIVERSITY, Bekasi
Software Engineering (undergraduate), Sep 2024 – expected 2028

- Excellence Program, FYP B2028 (Sep 2024 – May 2025).

WORKSHOPS & SEMINARS

- "Generative AI and Its Application in Industry" and "The Art of Data Hunting", School of Computer Science & DSAI (Jun 2026)
- "AI Use Cases Across Enterprise Functions", School of Computer Science & DSAI (May 2026)
- "Agile, Low Code and AI Software Design and Development", Student Support Office Bekasi (May 2025)
- "Microservices menggunakan bahasa Go (Golang)" workshop, School of Computer Science & DSAI
- "Threat Modelling", School of Computer Science & DSAI (Nov 2024)

SKILLS

Languages	Python, JavaScript, TypeScript, Java, Go
Web	HTML, CSS, Tailwind CSS, React, Next.js
Backend & infra	FastAPI, Flask, Supabase, Docker
AI & ML	TensorFlow, Keras, scikit-learn, NLTK, InsightFace, MediaPipe
Testing & tools	Playwright, Git, GitHub, Figma, Postman, VS Code
Organisational	HR management, interviewing, team training, agile methods
Spoken languages	Indonesian (native), English (professional working proficiency)
